Mockeyville, Grand-Bassam, Côte d'Ivoire

Life Skills Unit Plans

Life Skills

Grade 6 and Grade 7

Grade 6 · Grade 7 (taught together)

2026 – 2027 · Six modules · 18 lessons · Alternate Fridays with SEL

Companion to the Life Skills Scope and Sequence 2026–2027

Internal planning document · October 2026

How to Use These Plans

Grade 6–7, one combined class · 45-minute Life Skills Friday · six modules of three lessons. Life Skills alternates with SEL on Fridays: one Friday SEL, the next Friday Life Skills. Plan one lesson for the whole class; the grade lines give the expected outcome for each student. Students work in teams of three or four with Grade 6 and Grade 7 mixed. Grade 7 often leads a team, keeps time or demonstrates a skill; Grade 6 records, calculates and presents.

Talk is short; practice is long. In every lesson students do the real thing: wash and wring a shirt, place a partner in the recovery position, read a label, price a meal from real market prices. Materials are cheap or free. Most come from home or the recycling box; anything bought costs a few hundred francs at the market.

This year only. About 14 Life Skills Fridays remain from late October, depending on holidays and events. Start Module 1 now. Teach lessons 1 and 2 of every module, and lesson 3 whenever time allows. If a Friday is lost, merge lessons rather than skip a module.

- **Real numbers.** Ask students to collect real prices from the market, a boutique or a parent before the food and money lessons. Real prices make the maths matter.
- **Knives.** A small kitchen knife only with an adult beside the student, and only after the class has learned the knife rules in Module 4. One knife station at a time.
- **No heat.** No cooking, ironing, flames, gas or electricity in class. Recipes are no-cook.
- **First aid is awareness.** Students learn what to do and when to get help. It is not a certificate. Real injuries go to the school's first-aid lead.
- **Growing bodies.** Hygiene stays general: daily washing, clean clothes, sweat in the heat. Puberty, body changes and menstrual hygiene are held until after parent consultation. Put such questions in the question box and say they will be answered later.
- **Privacy.** Never ask students to share money, family income, screen time or sleep in front of others. Diaries and budgets can be private or use an invented character.
- **Safeguarding.** Any disclosure (for example, a student left in charge of small children for long periods, or someone asking for their mobile money code) goes straight to the Designated Safeguarding Lead, following the safeguarding policy.

Evidence. Each student has a Life Skills Passport. When a student shows a skill, stamp or sign it at one of three levels: **Not yet · With help · On my own**. Students can show one skill at the November and March Student Led Conferences.

Internal planning document. In anything families see, describe the approach as inquiry-based learning.

Class materials kit: two basins and a jug, bar soap, a clothes line and pegs, needles, thread and buttons, plasters, gauze and clean cloths, cutting boards, plastic knives and one small kitchen knife (kept by the teacher), printing for the passports and templates, and a small food budget for the cold kitchen lesson. Free or recycled: old T-shirts and pagne scraps, plastic bottles and caps, drink bottles and cans with labels, product packets, rice sacks, cardboard, newspapers, plastic bags for gloves, and real price lists from the market.

Module 1 · Taking Care of Me

Goals. Grade 6: keeps a daily care routine and washes their own clothes by hand. Grade 7: plans a routine independently, cares for their uniform and coaches a Grade 6 partner.

Lesson 1 · Caring for a Growing Body (45 min)

Materials: a basin, jug, soap and towel; a demo toothbrush and a model mouth (an egg carton); a clean shirt and a sweaty sports shirt (or pictures); care-item cards (soap, washcloth, toothbrush, toothpaste, clean socks, water bottle, optional deodorant, comb); an anonymous question box.

1. **Hook (5 min).** «It is 34 degrees and you have just played football at break. What does your body do? What do you need to do?» Take three answers.
2. **Teach (8 min).** As bodies grow, we sweat more, especially in our heat. Sweat itself is clean; bacteria on skin and clothes make the smell. So: wash every day with soap, including feet and underarms; put on clean underwear, socks and shirt every day; change after sport; drink water. Brush teeth twice a day for two minutes and clean the tongue. Deodorant is optional; washing is what matters. «Some of your questions are about how bodies change. We will answer those later in the year, after we have talked with your families.»
3. **Practise (20 min).** Three stations, about 6 minutes each. *Wash station:* teams wash hands and forearms with soap for 20 seconds, rinse with the jug, dry. *Teeth station:* brush the egg-carton teeth in small circles, front, back and chewing sides, while a partner times two minutes. *Kit station:* teams sort the care-item cards into «every day», «after sport» and «optional».
4. **Plan (7 min).** Each student writes a private daily care checklist for a school day and a sports day.
5. **Close (5 min).** Students may put a question in the box. «Name one thing you will change this week.»

Grade 6: completes the checklist and shows the washing and brushing steps. **Grade 7:** explains why sweat smells and leads a station.

Check. Stamp «I keep my body clean every day» when the student's checklist is complete and they demonstrate handwashing and brushing correctly.

Tip. Read the question box after class. Keep questions about puberty for after the parent consultation; pass anything about safety to the Designated Safeguarding Lead.

Lesson 2 · My Morning, My Routine (45 min)

Materials: task cards (wake up, wash, dress, breakfast, pack bag, brush teeth, help at home, leave for school; evening: homework, prepare uniform, pack bag, screens off, sleep), a clock or phone timer, routine chart templates, school bags and timetables.

1. **Hook (5 min).** «Kofi wakes at 6:30, cannot find his tie, has no clean socks, and his bag is not packed. School starts at 7:30. What will happen?»
2. **Teach (7 min).** Plan backwards from the time you must leave. Do some jobs the night before: pack the bag from the timetable, put the uniform out, fill the water bottle. Allow extra minutes for surprises. Teenagers need 8 to 10 hours of sleep, so bedtime sets the morning.
3. **Practise (15 min).** Team timing challenge. Teams time real tasks in class: packing a bag from tomorrow's timetable, folding and laying out a uniform, putting shoes and socks ready. They write the real minutes on the task cards, then order the cards into a morning timeline that ends at the leaving time.
4. **Build (10 min).** Each student fills their own morning and evening routine chart with real times, working backwards from leaving time and from bedtime.
5. **Close (8 min).** Partners check each other's chart: «Is there time for breakfast? Is bedtime early enough?» Students choose one change to try for one week and tick a tracker each day.

Grade 6: builds a morning routine with times. **Grade 7:** builds morning and evening routines, including enough sleep, and checks a Grade 6 partner's plan.

Check. Stamp «I plan and keep my routine» after the student shows a week of ticks on the tracker.

Lesson 3 · Laundry Skills (45 min)

Materials: two basins (wash and rinse), jug, bar soap, a clothes line and pegs in the shade, one small item per student from home (socks, handkerchief or T-shirt), a few old items with a mark of earth or food, a picture of bleach (not handled).

1. **Hook (3 min).** «Who washes your uniform? Could you do it if you had to?»
2. **Demonstrate (7 min).** Sort: whites, colours, very dirty. Soak in soapy water. Rub soap straight onto stains and rub the cloth against itself. Wash collars, cuffs and underarms carefully. Rinse in clean water until no soap comes out. Wring by twisting. Shake and hang inside out in the shade to protect colours. Soap and water only; bleach is for adults.
3. **Bucket laundry challenge (25 min).** Teams of four sort the class pile, then each student washes, rinses, wrings and hangs their own item. Grade 7 judges: Is the stain lighter? Is the soap rinsed out? Is the item wrung well, not dripping? Teams then swap roles for a second item.
4. **Fold (7 min).** While items dry, practise folding a dry uniform shirt and trousers or skirt neatly, and hanging a shirt on a hanger. Uniform care: hang it up at night, wash it after a sweaty day, treat stains fast.
5. **Close (3 min).** «Which step will you do at home this week?»

Grade 6: washes, rinses, wrings and hangs one item. **Grade 7:** removes a stain and judges the team's work.

Check. Stamp «I wash clothes by hand» and «I care for my uniform».

Tip. Do this outdoors in the shade. Ironing is not taught in class because it uses heat.

Home practice. Wash your own socks or a uniform shirt by hand once this week and keep your morning routine tracker.

Module 2 · Healthy Body

Goals. Grade 6: plans a balanced day of local meals and chooses water over sugary drinks. Grade 7: keeps the plan within a budget and builds a sleep, screen and movement plan.

Lesson 1 · Eat Well on a Budget (45 min)

Materials: real market price lists collected by students beforehand, a go/grow/glow poster, meal plan templates (breakfast, lunch, dinner, snack, drink; item, price), calculators or phone calculators.

1. **Hook (5 min).** «Your aunt gives you 2,000 FCFA to feed yourself for one day. What will you buy?» Take three quick answers.
2. **Teach (8 min).** A balanced day has *go* foods for energy (attiéké, rice, placali, foutou, banane, bread), *grow* foods for building the body (poisson braisé, haricots, eggs, arachides, chicken) and *glow* foods for protection (gombo, tomatoes, mangue, papaye, orange, avocat). Each meal has some of each. Water is the best drink. We talk about energy, growth and strength.
3. **Plan (22 min).** Teams use their real price lists to plan one balanced day for one person: three meals, a snack and drinks. They write each price, add the total and check it is within the agreed budget. If they are over, they swap items (haricots for meat, a fruit in season, water instead of a sweet drink).
4. **Share (7 min).** Two teams present their day. The class asks: «Is every meal balanced? Is it within budget?»
5. **Close (3 min).** «Which swap saved the most money and kept the meal healthy?»

Grade 6: plans a balanced day and adds the prices correctly. **Grade 7:** keeps the plan within budget and explains each swap.

Check. Stamp «I plan a balanced day of meals».

Tip. Use the class's own price lists. Never discuss weight, body size or calories.

Lesson 2 · What's in My Drink? (45 min)

Materials: empty drink bottles and cans with labels (soda, juice, malt drink, sweetened yogurt drink, water; one empty energy drink can or a picture), a teaspoon, a bowl of sugar or dry sand, clear plastic cups, a jug of water.

1. **Hook (5 min).** Line up five bottles. «Put them in order from least sugar to most.» Students guess before reading anything.
2. **Teach (8 min).** Find «sugars» on the label. It is often given per 100 ml, so multiply by the size of the bottle. One teaspoon of sugar is about 4 grams. Homemade bissap or juice has no label: ask how much sugar was added. Water has none. Sugar harms teeth and gives quick energy that soon drops. We look at sugar, not at calories.
3. **Practise (20 min).** Teams take two drinks each. They read the label, work out the grams of sugar in the whole bottle, divide by 4 and spoon that many teaspoons of sugar or sand into a cup beside the bottle. Teams re-order the bottle line-up using their results and compare with their guesses.
4. **Energy drinks (7 min).** Energy drinks contain caffeine and other stimulants and are not for children. They can cause a racing heart, poor sleep and headaches. «If someone offers you one at a match, what can you drink instead?» In the heat, drink water often, before you feel thirsty.
5. **Close (5 min).** Each student writes one drink swap they will make this week.

Grade 6: reads a label and counts the teaspoons. **Grade 7:** does the multiplication for any bottle size and explains why energy drinks are not for children.

Check. Stamp «I read drink labels».

Tip. Sand works as well as sugar and costs nothing. Nothing in this lesson is eaten or drunk except water.

Lesson 3 · Sleep, Screens and Movement (45 min)

Materials: 24-hour clock templates, sleep diary sheets for one week, a space in the shade, water.

1. **Hook (5 min).** «Hands up if you have ever used a phone in bed after the lights went off.» No names, no judgement.
2. **Teach (8 min).** Children aged 6 to 12 need 9 to 12 hours of sleep; teenagers need 8 to 10. Bright screens and exciting games make it harder to fall asleep, so screens go off and out of reach well before bed. Bodies need at least 60 minutes of active movement every day: walking, football, dancing, swimming, helping at home.
3. **Move (12 min).** Grade 7 leads a 10-minute active circuit in the shade: jumping jacks, running on the spot, squats, dance moves, a relay. Water break. «That was about 10 minutes. Where will the other 50 come from today?»
4. **Plan (15 min).** Each student fills a 24-hour clock for a normal school day: sleep, school, travel, meals, homework, movement, screens. They check: enough sleep? 60 minutes of movement? Screens off before bed? They set one goal and start a one-week sleep diary (bedtime, wake time, screens off time, minutes of movement).
5. **Close (5 min).** The class agrees a class target, for example «screens off 30 minutes before bed». Diaries come back next Friday.

Grade 6: completes the 24-hour plan and keeps the diary. **Grade 7:** reviews the diary, spots one pattern and adjusts the plan.

Check. Stamp «I plan sleep, screens and movement» when the diary returns.

Tip. Diaries are private. Students can share what they learned, not their numbers.

Home practice. Plan one day of family meals with a parent using real market prices, and keep your sleep diary for a week.

Module 3 · Staying Safe

Goals. Grade 6: checks for danger, calls 185 and explains a home fire plan. Grade 7: places someone in the recovery position, acts calmly in a gas or fire emergency and explains what to do in a rip current.

Lesson 1 · First Aid Basics (45 min)

Materials: a cardboard phone, scenario cards, clean cloths or gauze, plasters, plastic bags to use as gloves, a basin and jug of water, a mat or sacks to lie on, a timer.

1. **Hook (3 min).** «Moussa falls off his bike outside the school gate and does not get up. What do you do first?»
2. **Teach (10 min).** Demonstrate the steps. *Danger:* check it is safe for you (traffic, wires, fire). *Response:* tap the shoulders and ask loudly «Can you hear me?» *Shout for help. Call 185 (SAMU):* say your name, where you are, what happened, how many people are hurt, and stay on the line. *Recovery position:* for someone who is breathing but not responding. Do not move someone who fell from a height unless they are in danger; wait for help.
3. **First-aid stations (25 min).** Four stations, about 6 minutes each. *Call 185:* role-play the call with a partner as the operator. *Recovery position:* place a partner on their side, top knee bent, head tilted back so the airway is open. *Bleeding:* cover hands with a plastic bag, press a clean cloth firmly on the «cut» and keep pressing. *Burns:* pour cool water from the jug over a partner's arm and say the rule: cool running water for 20 minutes; never oil, toothpaste or butter.
4. **Scenario round (4 min).** Teams draw a scenario card and say the first three things they would do.
5. **Close (3 min).** «This is first-aid awareness, not a certificate. When in doubt, call 185 and get an adult.»

Grade 6: checks for danger and role-plays the 185 call. **Grade 7:** places a partner in the recovery position correctly and leads a station.

Check. Stamp «I know first-aid basics and call 185».

Tip. Nosebleed: sit, lean forward and pinch the soft part of the nose for 10 minutes. Never tip the head back. Any real injury goes to the school's first-aid lead.

Lesson 2 · Fire and Electricity at Home (45 min)

Materials: picture cards (gas bottle and cooker, charcoal stove, multi-socket with many plugs, damaged wire, wet hands on a switch, candle near a curtain), a cardboard phone, paper and pencils for home plans.

1. **Hook (5 min).** «You come home and smell gas in the kitchen. What do you do?» Take answers; do not correct yet.
2. **Teach (10 min).** *Gas smell:* no flames, no matches, no switches, no phone in the room. Open windows and doors. Get everyone out. Call 180 (Pompiers) from outside. *Electricity:* dry hands before touching switches or plugs; one plug per socket, no overloaded multi-sockets; never touch a damaged wire; pull the plug, not the cable. *Fire:* get out, stay out, call 180. Crawl low under smoke. If clothes catch fire: stop, drop and roll.
3. **Practise (15 min).** Gas drill: a team «smells gas» in the classroom. They say «No switches!», open windows and the door, lead everyone out to the meeting point and call 180 on the cardboard phone. Repeat with a fire drill: crawl low, out, meeting point, call 180. Then teams sort the picture cards into «safe» and «danger» and say the fix for each danger.
4. **Home escape plan (12 min).** Each student draws a plan of their home: two ways out, a meeting point outside, who calls 180, and where the gas bottle is.
5. **Close (3 min).** «Show your plan to your family this week and practise it once.»

Grade 6: explains the gas steps and draws a home escape plan. **Grade 7:** leads the drill calmly and explains each electrical hazard.

Check. Stamp «I have a home fire plan» when the plan comes back signed by a family member.

Tip. No real flames or plugs are used in this lesson.

Lesson 3 · Safe on the Road and at the Beach (45 min)

Materials: chalk, a helmet if one can be borrowed, flag cards (green, yellow, red), a long rope or chalk line as the «shore», a plastic bottle that floats, scenario cards.

1. **Hook (3 min).** «What is the most dangerous road you cross every day? What is the most dangerous thing at our beach?»
2. **Road practice (15 min).** Outdoors, chalk a road. Traffic drives on the right, so look left, right, then left again. Cross at a safe, open place, not between parked cars or on a bend. Walk, do not run. Be seen. Motorbike taxis: always wear a fastened helmet, one passenger only, hold on, and say no if the driver is going too fast. Students take turns as walkers, cars and motorbikes.
3. **Beach teach (10 min).** Flags: green, swim with care; yellow, take care; red, do not swim. The sea at Grand-Bassam has strong currents. A rip current is a strong channel of water moving away from the shore: look for a calm-looking gap in the waves, or foam and sand moving out. If you are caught: do not swim against it. Swim parallel to the shore, or float, raise a hand and shout for help.
4. **Rip drill (12 min).** On the chalk shore, a «current» pulls students out. They practise: stay calm, swim parallel (walk along the line), or float and raise a hand. Helpers on the shore practise: do not go in; shout for help, throw something that floats (the bottle) and call 185.
5. **Close (5 min).** «Name one road rule and one beach rule you will teach someone at home.»

Grade 6: crosses correctly and reads the flags. **Grade 7:** explains what to do in a rip current and how to help without going in.

Check. Stamp «I am safe on the road and at the beach».

Tip. Keep outdoor activity in the shade with water available. Lessons never go near deep water.

Home practice. Practise your home escape plan with your family and teach them the numbers 170, 180 and 185.

Module 4 · Helping at Home

Goals. Grade 6: prepares food safely and sews on a button. Grade 7: plans a no-cook group meal, mends a hem or tear and plans safe care for a younger child.

Lesson 1 · Cold Kitchen Chefs (45 min)

Materials: allergy check before the lesson; ready-made attiéké (bought from the market), tomatoes, onions, cucumber, salt, a little oil, or bread and avocado for sandwiches; cutting boards; plastic knives; one small kitchen knife kept by the teacher; two basins, soap, clean cloths, bowls and plates.

1. **Hygiene (5 min).** Everyone washes hands with soap for 20 seconds. Tie back hair. Wipe tables with soap and water. Wash all vegetables in clean water.
2. **Knife rules (7 min).** Teach and repeat: a small knife only with an adult beside you; cut on a board, never in your hand; the claw grip, fingertips tucked in; cut away from your body; carry the knife point down, by your side; put it down flat, never in the washing-up water; never wave or point it. Students repeat the rules back before anyone cuts.
3. **Plan and roles (5 min).** Teams agree the menu, ingredients and jobs: washers, cutters, mixers, servers, cleaners. Grade 7 leads each team.
4. **Prepare (18 min).** The teacher runs one knife station: one student at a time cuts tomato and onion with the adult beside them while the rest of the team uses plastic knives on soft foods (avocado, cucumber slices), mixes the attiéké with the vegetables and a pinch of salt, or builds sandwiches. Everyone rotates through the knife station if time allows.
5. **Eat and clean (7 min).** Serve, eat together, then wash dishes in two basins: wash, then rinse.
6. **Close (3 min).** «What would you change next time? What did it cost per person?»

Grade 6: follows hygiene and knife rules and prepares one part of the meal. **Grade 7:** leads the team plan and works out the cost per person.

Check. Stamp «I prepare food safely» and «I follow the knife rules».

Tip. Use the meal plans from Module 2 to choose the menu. Food is washed, covered and eaten the same day.

Lesson 2 · Sew and Mend (45 min)

Materials: needles, thread, buttons with two or four holes, pagne scraps, old shirts or trousers with a loose hem or small tear, scissors, a needle cushion (a bottle cap with a piece of sponge).

1. **Hook (3 min).** «A button falls off your uniform shirt on Monday morning. What do you do?»
2. **Demonstrate (7 min).** Thread the needle and knot the thread. *Button:* mark the spot, sew up and down through the holes about six times, wind the thread under the button, knot at the back. *Hem:* fold the edge, use small slip stitches. *Tear:* turn inside out, sew small close stitches across the tear.
3. **Button practice (15 min).** Every student sews a button onto a pagne scrap. Partners test it: pull gently. Is it firm?
4. **Mending practice (15 min).** Students mend a hem or a small tear on an old item or a scrap. Grade 7 helps anyone stuck threading or knotting.
5. **Close (5 min).** Count the needles back into the cushion. «What will you mend at home?»

Grade 6: sews on a firm button. **Grade 7:** sews on a button and mends a hem or tear neatly.

Check. Stamp «I sew on a button» and «I mend a tear».

Tip. Count needles out and back in at every lesson.

Lesson 3 · Looking After Little Ones (45 min)

Materials: picture cards of home hazards (bucket of water, open gate to the road, cooking pot, medicines, small objects, plastic bags, steps), scenario cards, a list of safe games for small children, a card for each student to write important numbers.

1. **Hook (5 min).** «Your mother goes to the market for an hour and leaves you with your three-year-old brother. What could go wrong? What will you do?»
2. **Teach (8 min).** *Supervision:* eyes on them all the time; within arm's reach near water, even a bucket. *Dangers:* water, the road, cooking and fire, medicines and cleaning products, small objects they can swallow, plastic bags. *Hygiene:* help them wash hands before eating and after the toilet. *Who to call:* a parent, a trusted neighbour, then 185 for illness or injury, 180 for fire, 170 for police. You are helping, not replacing the adult: if something is too much, call an adult.
3. **Practise (17 min).** Teams sort hazard cards and say the fix (empty the bucket, close the gate, move medicines up high). Then they role-play scenario cards: the toddler finds a coin, the baby is crying and will not stop, the child has a fever. Each student fills in their number card.
4. **Mentoring link (10 min).** Link to the SEL grand frère / grande sœur mentoring: teams plan a safe 10-minute game for their Early Years mentees (song, ball rolling, story, building with cartons) and check it against the hazard list. If arranged with the Early Years teacher, Grade 7 runs it with their mentee.
5. **Close (5 min).** «Name one thing you will always do when you look after a little one.»

Grade 6: spots hazards and knows who to call. **Grade 7:** plans and leads a safe game with a younger child.

Check. Stamp «I care safely for a younger child».

Tip. If a student says they are often left alone with very young children for long periods, follow the safeguarding policy and speak to the Designated Safeguarding Lead.

Home practice. Sew on a button or mend something at home, and help prepare one no-cook family snack with an adult.

Module 5 · Money Smart

Goals. Grade 6: budgets with real prices and keeps a PIN private. Grade 7: manages a full event budget, spots mobile money scams and plans a mini enterprise.

Lesson 1 · Budget for an Event (45 min)

Materials: real price lists for drinks, snacks, fruit, plates and decorations (collected beforehand), budget templates (item, quantity, unit price, total), calculators or phone calculators, the event budget agreed with the Principal.

1. **Hook (5 min).** «We have a fixed amount for an end-of-module class event. If we spend it all on drinks, what happens?»
2. **Teach (8 min).** A budget lists every item, how many, the price for one and the total. Needs come first, wants after. Keep a little money spare for surprises. Compare prices; buy in bulk if it is cheaper.
3. **Budget (20 min).** Teams plan the event for the whole class within the budget: food, drinks, plates and cups, decorations. They fill the template from their real prices and add the grand total. If they are over budget, they cut or swap items.
4. **Check (7 min).** Teams swap budgets and check the maths and that every student is included. They give one comment.
5. **Close (5 min).** The class votes on the best budget to use for the real event.

Grade 6: fills the budget template correctly. **Grade 7:** keeps the plan within budget and includes money for surprises.

Check. Stamp «I make a budget with real prices».

Lesson 2 · Mobile Money Safety (45 min)

Materials: scam-spotter cards with invented messages and calls (a «wrong transfer» message, a «you have won» message, a caller claiming to be an agent who asks for your code), three jars or boxes labelled spend, save, share, paper slips.

1. **Hook (5 min).** «Who in your family uses Orange Money, MTN MoMo, Moov Money or Wave? What would happen if someone knew their PIN?»
2. **Teach (10 min).** Rule one: never share your PIN or any code you receive by SMS, with anyone, ever. Real staff will never ask for it. Common scams: the *wrong transfer* call («I sent you money by mistake, please send it back») — check the real balance in the app with an adult, never the SMS alone; the *you have won* message that asks you to pay or send a code first; *fake agents* who call to «unblock» your account. Rule two: always ask an adult before sending, receiving or answering.
3. **Scam spotters (15 min).** Teams read each card and decide: safe or scam? What are the warning signs (rush, a prize, asking for a code, a stranger)? What do you do? Each team role-plays one call: one student plays the scammer, one says «No. I will ask an adult» and hangs up.
4. **Spend, save, share (10 min).** Each student splits an imaginary 5,000 FCFA into spend, save and share and explains why. Teach the tontine: a group saves the same amount each week and each member takes the whole pot in turn. It is community saving built on trust. «What makes a tontine safe? What makes it risky?»
5. **Close (5 min).** «Teach one adult at home the three scam warning signs.»

Grade 6: spots a scam and refuses to share a code. **Grade 7:** explains all three scams and how a tontine works.

Check. Stamp «I keep my PIN private and spot scams».

Tip. Use invented names and numbers on the cards. If a student says someone has asked them for a code or money, tell the Designated Safeguarding Lead.

Lesson 3 · Mini Enterprise (45 min)

Materials: recycled materials (bottles, cans, pagne scraps, cardboard, bottle caps), example products (a pen pot, a pagne scrunchie, a bottle-cap keyring), real prices for anything to buy (thread, glue, string), business plan templates (product, materials and cost, price, number to make, profit, what profit is for).

1. **Hook (5 min).** Show a pagne scrunchie. «How much would you pay? How much did it cost to make?»
2. **Teach (8 min).** *Cost:* what you spend on materials. *Price:* what the buyer pays. *Profit:* price minus cost. Even free materials need time and some bought items. A good price is fair and covers the cost. Plan what the profit is for: spend, save, share.
3. **Plan (22 min).** Teams choose a product from recycled materials to sell at a school event. They list materials and costs, set a price, decide how many to make and work out the expected profit. Each team makes one prototype.
4. **Pitch (7 min).** Teams pitch in one minute: product, cost, price, profit. The class asks one question each.
5. **Close (3 min).** Plans go to the Principal for approval before anything is sold.

Grade 6: works out cost, price and profit for one product. **Grade 7:** leads the business plan and the pitch.

Check. Stamp «I plan a mini enterprise».

Tip. Nothing is sold without the Principal's approval. The profit can fund the Module 6 campaign.

Home practice. Help an adult plan the week's market shopping within a budget, and teach them the rule «never share your PIN or code».

Module 6 · Caring for Our Planet

Goals. Grade 6: sorts and counts the school's waste and makes a useful item from it. Grade 7: analyses the audit, leads the campaign and presents an action plan.

Lesson 1 · School Waste Audit (45 min)

Materials: one day's waste from classroom bins (checked first by an adult), plastic bags to use as gloves, old sacks or a tarp to work on, labelled sacks (plastic bottles, sachets and bags, paper and card, food waste, cans, other), tally sheets, chart paper, soap and water.

1. **Safety brief (5 min).** Hands covered with plastic bags. Do not touch glass, sharp items, tissues or anything unknown: call the teacher. Work outdoors in the shade. Wash hands with soap after.
2. **Predict (5 min).** «What do you think our school throws away most?» Each team writes a prediction.
3. **Sort (15 min).** Teams sort the waste into the labelled sacks.
4. **Count (10 min).** Teams count the items in each category and record on tally sheets. Grade 7 checks the totals.
5. **Chart (7 min).** Teams draw a bar chart of the results and compare with their prediction.
6. **Close (3 min).** Wash hands. «What surprised you? Where does our waste go after it leaves school?»

Grade 6: sorts and counts accurately. **Grade 7:** draws the chart and names the biggest problem.

Check. Stamp «I can audit waste».

Tip. An adult removes anything unsafe before the lesson.

Lesson 2 · Make It Better (45 min)

Materials: clean, dry plastic bottles, clean dry plastic sachets and wrappers, sticks for packing; old T-shirts or pagne, scissors; a bucket or box with fruit peel, dry leaves and soil for compost.

1. **Hook (5 min).** Show the audit chart. «Which of these can we stop throwing away?»
2. **Demonstrate (5 min).** *Ecobrick:* pack clean, dry plastic tightly into a bottle with a stick until it is hard. *T-shirt bag:* cut off the sleeves and widen the neck to make handles, then cut a fringe at the bottom and tie the strips in knots to close it. *Compost:* layer food peel, dry leaves and soil; keep it damp and turn it.
3. **Stations (30 min).** Three stations, 10 minutes each: ecobricks, reusable bags from old T-shirts or pagne, compost bucket for the school garden. Grade 7 leads one station each.
4. **Close (5 min).** Each team writes the number of items made and how much waste they kept out of the bin.

Grade 6: makes an ecobrick and a bag. **Grade 7:** leads a station and explains how each idea reduces waste.

Check. Stamp «I turn waste into something useful».

Tip. Plastic must be clean and dry or the ecobrick will smell.

Lesson 3 · Green Campaign (45 min)

Materials: the audit chart, items made in Lesson 2, chart paper and markers, a short message template for families (English first, then French).

1. **Plan (10 min).** Teams agree the campaign: one problem from the audit, one action for the school (for example, a bottle collection point or a «bring your own bag» day) and one action for families. Success criteria: «Every class has a sorting bin», «20 families send a reusable bag».

2. **Prepare (15 min).** Teams make posters, a short talk for younger classes and a message for families, English first, then French.
3. **Present (15 min).** Teams present their findings and action plan to a younger class or rehearse for a family event: the chart, what we made, what we ask you to do.
4. **Evaluate (5 min).** «Did the younger children understand? What will we check in two weeks?»

Grade 6: presents one part of the campaign. **Grade 7:** leads the campaign plan and evaluates its impact.

Check. Stamp «I lead a green campaign».

Tip. This can be the same project as the SEL Module 6 service project. Families hear the message in English first, then French.

Home practice. Sort your family's rubbish for one day and make one ecobrick or reusable bag at home.
